Cook up some energy savings

Here are a couple of tips to help you cook up some sweet savings in your energy costs...

- Keep pots & pans covered to conserve heat.
- Match the size of the pan to the size of the ring.
  - A smaller pan on a larger burner wastes 40% of energy.
- Allow about 10-15 mins. when preheating the oven.
- Although cooking instructions may direct you to preheat before beginning, most ovens will take only about 10-15 mins. to heat up.
